SECTION A:

INTRODUCTION & GRAPHIC STANDARDS

Section A provides a general introduction to the design standards of the system, including specifications for all overarching color, materials, symbols and typography. Brand standards and terminology usage specific to exterior signage are outlined.

Kit of Parts: Brand Usage

Brand Usage

The Guidelines have been developed by the Office of the University Architect in cooperation with University Communications and Marketing, and with extensive advice and consultation from faculty, staff, students and alumni. The Board of Governors of the University formally approved the visual identity system on December 8, 2006, as the next major step in the development of a comprehensive communications program for the University.

Since the power of a strong visual identity can only be realized through consistent application over time, it is the University's policy that the official logotype, signatures and marks as described in the Rutgers Visual Identity Manual and Signage Standards Manual are the only sanctioned marks for use.

No other marks or symbols may be used or created to represent the University as a whole or any part thereof; other than those shown in the Rutgers Visual Identity Manual (reference below) and those shown in this manual.

The full Rutgers Visual Identity Manual can be reviewed at <http://identity.rutgers.edu/guidelines-use/rutgers-visual-identity-manual>.

The Rutgers Logotype

The Rutgers logotype appears below. It is the primary element of the Rutgers visual identity system. The Rutgers logotype is a custom designed graphic and may not be altered in any way.

A secondary element may be added to the Rutgers logotype creating a typographic element called a signature. Signatures have been reserved for use in patient buildings and spaces only.

The Rutgers logotype may not be attached to any typographic or graphic element other than those described above.

As a general rule of thumb, it is always preferred to use the simplest (i.e. highest level) logo representation that will adequately communicate your identity as part of Rutgers.

The logotype may be downloaded at identity.rutgers.edu/downloads.

Size and Clear Space Requirements

There should be a minimum clear space around the logotype equal to the cap "R" height. The light blue area in the diagram below indicates the amount of space that must be maintained between the logotype and any other element for vinyl messaging only.

Size and Clear Space Requirements - Modified for Signage Only

Logotype Header

RU Health Header

Color Header

Application of Brand Header Elements

A Rutgers branded header should always be used on post and panel sign types. Below is an outline distinguishing when the logotype header, Rutgers Health and plain red color header is used.

Logotype Header

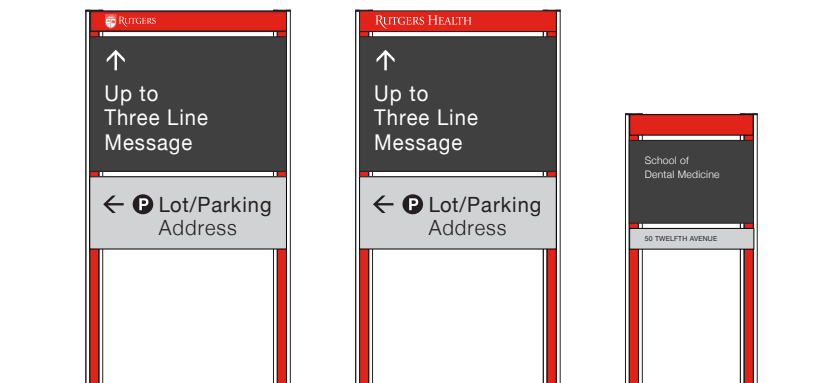

- Used on **ALL** vehicular directionals and parking identification signs.
- Used on freestanding building identification signs when the building is far removed from the edges of campus and/or it is a stand alone building and it is not apparent that you are on the Rutgers campus.

Rutgers Health Header

- Used on freestanding building identification signs.

Color Header

- Used on **ALL** freestanding building identification signs. (See exceptions above).
- Used on **ALL** pedestrian directional signs.

Paint / Material Usage

Primary Color Palette

The primary colors for the Rutgers signage system are based on the Rutgers visual identity. We have modified these colors and materials for the exterior environment and purposes of maintaining the signage over time.

Paints

All painted surfaces on signage are to be pre-treated with Matthews Paint MP 74734 SP for corrosion resistance. All signs to be finished with Matthews two-coating Satin Finish MAP Top Coat System.

Vinyl

Vinyl is to be used for building identification on glass surfaces.

Reflective Vinyl

Reflective vinyl is to be used on all vehicular directional signage, as well as all freestanding building identification signage.

Brushed Aluminum

Brushed aluminum is to be used on the exterior building identification dimensional letters.

*The custom sign for small projects a fabricated post detail is provided. For large projects pf over XXX linear feet the Rutgers owned custom extrusion must be used. must be used. No substitutions allowed. For specification and ordering purposes, contact EMS Delaware;

Symbol Usage

The symbols on this page are to be used appropriately on the sign types as specified in the following page examples.

This family of symbols has been approved by the committee for use on campus. If you do not find a symbol for your depiction, please contact the University representative **xxxx**.

Please contact **XXXX XXXXXXXX**, for all final artwork & approval.

Directional Arrows

The primary arrow for use in wayfinding is depicted on this page. Note the orientation of the arrow and its uses for navigation. Please do not add any elements to the stems or the arrow head. The graphic is intended to be used for all wayfinding and has a direct relationship to the typography.

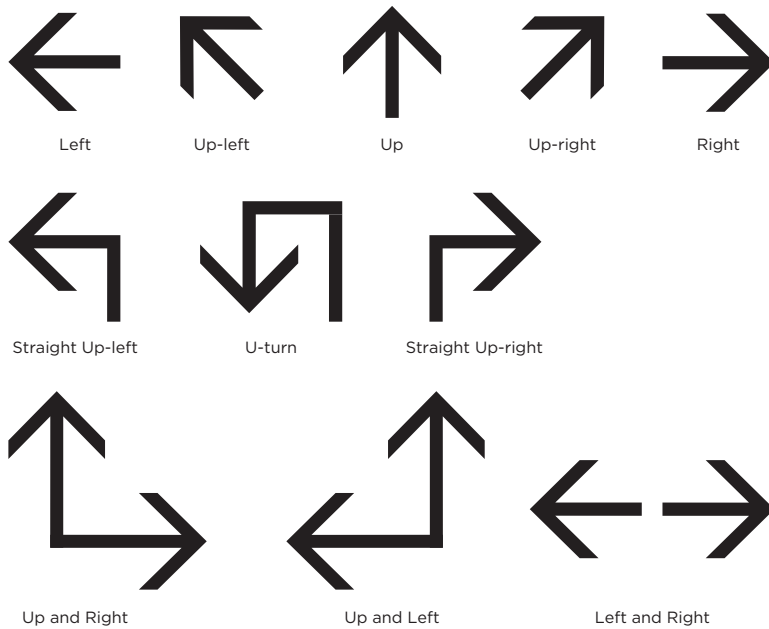

Arrow Order

When determining arrow placement on individual directional panels, follow this order.

- ↑ Up Arrow
- ← Left Arrow
- Right Arrow

If more than one destination uses the same arrow direction, the order of messages to be determined by proximity of destination to sign location. The closest destination is the first message. See individual sign layouts for references.

SYMBOLS

DIRECTIONAL ARROWS

Primary Typefaces

The ITC Helvetica Neue Light and Regular font families have been chosen as the primary typeface for Rutgers University Comprehensive Wayfinding System.

The typeface allows for flexibility and creative expression in the text and display. The font families displayed on this and the following page have been purchased by the University Architects office for use in the system.

You need the Helvetica font installed on your computer to use the Helvetica in your signage layouts. Sign layouts should be oriented by the wayfinding champion and signage fabricator.

Opentype fonts are recommended as they are compatible with both Mac and PC formats. NO substitutions for fonts are allowed.

Helvetica Neue Light

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890

Helvetica Neue Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890

LETTERSPACING

Careful and consistent letter spacing, or tracking, is critical for maximizing message legibility. Refer to the examples below for acceptable letter-spacing.

Main Entr&

Inconsistent Letter-spacing

Main Entr&

Correct Letter-spacing

APOSTROPHE

Sometimes the foot mark is mistaken for an apostrophe and an inch mark is mistaken for quotations. Refer to the examples below for the correct apostrophe for each typeface.

Park's

Incorrect apostrophe

Park's

Correct apostrophe

TEXT MEASUREMENT STANDARDS

When measuring copy height, measure only the height of the capital letters to determine overall copy height. Some lower-case letters have ascenders and desenders that extend beyond the average capital letter height and should not be used for measurement. (shown as x measurement below)

x
Height

When measuring line spacing, measure from baseline to baseline. (Shown as y measurement below)

y
Line
Spacing

Questions? Please contact [xxxxx](#)

ACCEPTABLE ABBREVIATIONS (FOR EXTERIOR SIGNAGE):			
WORD:	ABBREVIATION:	WORD:	ABBREVIATION:
Building	Bldg.	Recreation	Rec.
Advanced	Adv.	North	N.
Center	Cntr.	South	S.
Centers	Cntrs.	East	E.
Department	Dept.	West	W.
Science	Sci.	Apartments	Apts.
Administration	Admin.	University	Univ.
And	&	Street	St.
Education	Edu.	Avenue	Ave.
Incorporated	Inc.	Lane	Ln.
Entrance	Entr.	Road	Rd.
		Monday - Friday	Mon-Fri

ACCEPTABLE ACRONYMS (FOR EXTERIOR SIGNAGE):	
WORD:	ABBREVIATION:
Information Technology	IT
Reserve Officers Training Corps	ROTC
Robert Wood Johnson Medical School	RWJMS

Abbreviation Use

- Abbreviations are only to be used on vehicular and pedestrian directionals in order to fit longer messages.
- Building identification signs should not use any abbreviations.
- On vehicular and pedestrian directional signs, all Student Centers and Campus Centers drop the campus name and are referred to only as "Campus Center" or "Student Center."

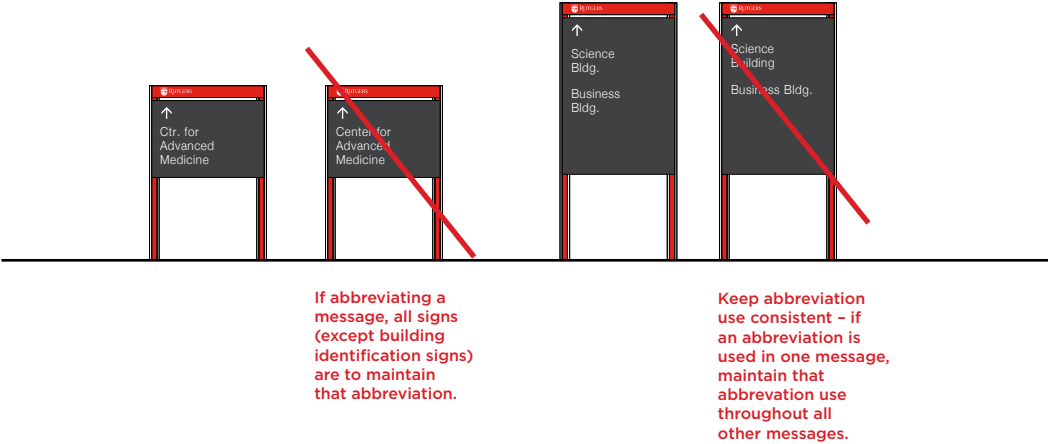

Acronym Use

- Most people do not know or understand what acronyms indicate. Acceptable acronyms are those that are universally known outside of Rutgers University.
- Acronyms specific to Rutgers University (such as the building name acronyms) are confusing to first time visitors and are NOT to be used.

Messaging Consistency

- If abbreviating a message, all signs (except building identification signs) are to maintain that abbreviation.
- Keep abbreviation use consistent – if an abbreviation is used in one message, maintain that abbreviation use throughout all other messages.

Messaging Consistency Examples - Vehicular Directional

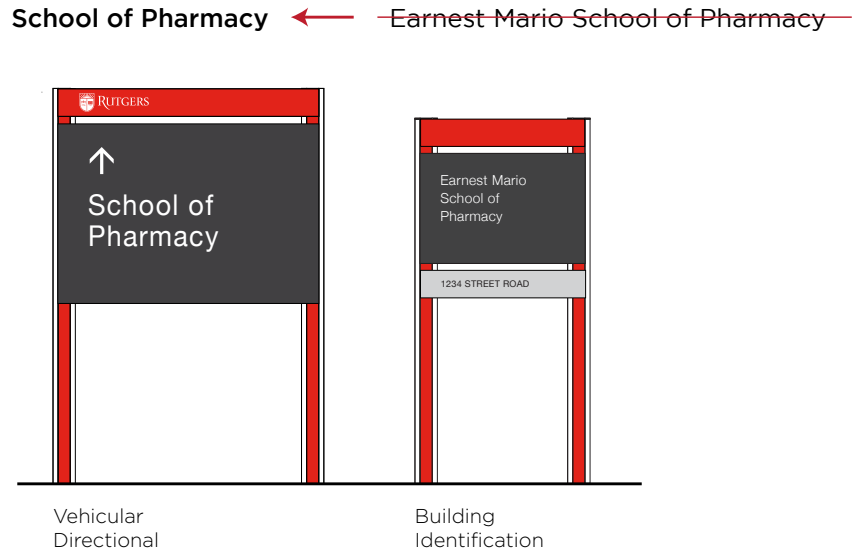

Specifications

Donor Names

- Donor names can be used on building identification signs.
- Donor names are NOT to be used on directionals.
- If the event occurs where removing the donor names creates two buildings to be exactly the same a shorter version of the name may be used. (Example: “George Smith Library” and “Ryan Johnson Library” would change to “Smith Library” and “Johnson Library.”)

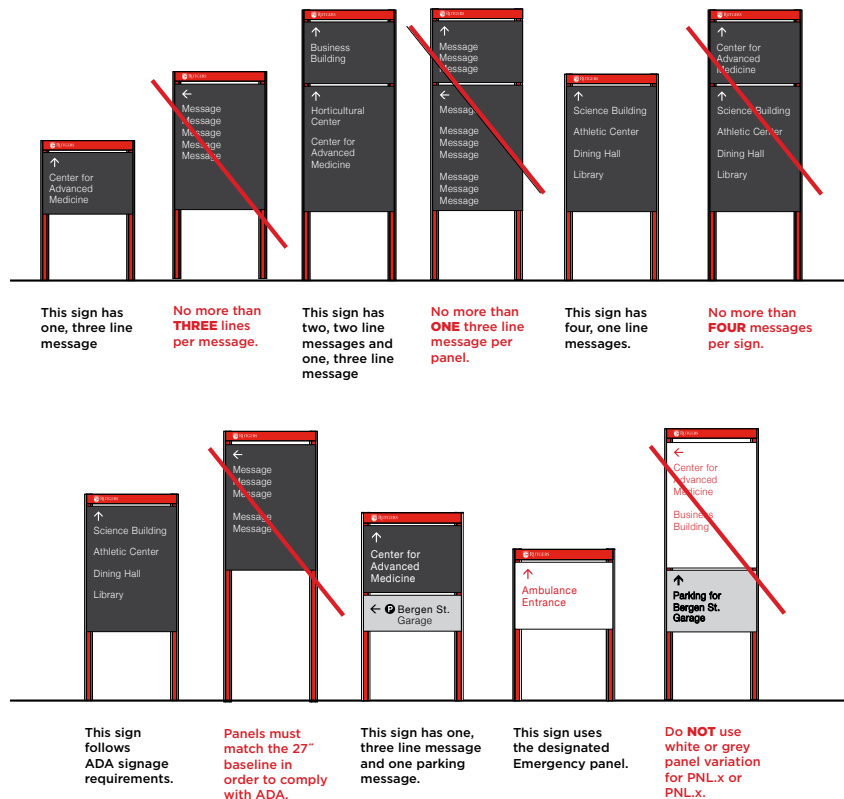

Donor Messaging Examples - For Directional Signs Only

Rules for Vehicular Directional Messaging

- No more than one, three-line message per panel. When traveling at high speeds, more than one three-line message becomes too much information for a visitor to decipher.
- No more than three lines per message. When traveling at high speeds, messages longer than three lines become illegible.
- Panels must match 27" baseline in order to comply with ADA requirements.
- Do not use white or grey panel variation for PNL_X. These panels are designated for parking and emergency messaging only at the sizes designated on the system pages.

Messaging Examples - Vehicular Directional

SECTION B:

SIGN MENU OVERVIEW

Section B shows a graphic and written description of each sign type in the exterior system. Sign types are categorized by function.

Arrival Gateway - AR10 Series

AR10 Series

Function

Provide a sense of arrival as visitors are entering the campus. Provide a placemaking element at the campus core.

Application

Used at the entrance of campus only. The placemaking moment is located at the campus core, one of these moment should occur per campus.

Select Your Sign

Use the table below to select the correct AR10 Series sign type for your needs. Refer to specific page for details and design intent drawings.

Banner Directional - BNR10 Series

BNR10 Series

Function

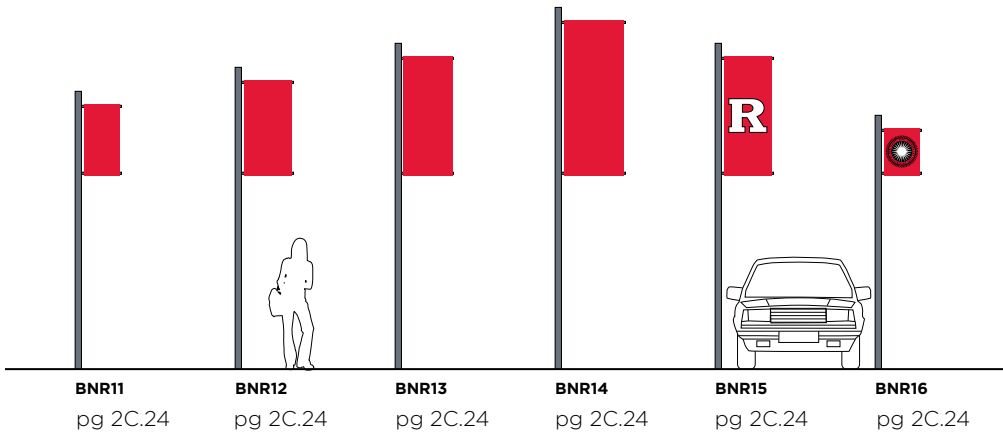

Provides visibility of campus boundaries and main thoroughfares.

Application

Used to mark campus boundaries and main thoroughfares.

Select Your Sign

Use the table below to select the correct BRN10 Series Sign type for your needs. Refer to specific page for details and design intent drawings.

BNR10 SERIES:					
BANNER TYPE	CAMPUS ARRIVAL	ATHLETIC FACILITIES/FIELDS	CAMPUS CORE	PEDESTRIAN PATHS	SURROUNDING CITY STREETS
BNR11	X	N/A	N/A	N/A	X
BNR12	X	N/A	N/A	N/A	X
BNR13	X	N/A	N/A	N/A	X
BNR14	X	N/A	N/A	N/A	X
BNR15	N/A	X	N/A	N/A	N/A
BNR16	N/A	N/A	X	X	N/A

Skyline Signage - SKY10 Series

SKY10 Series

Function

Provides campus and brand visibility from a distance.

Application

Illuminated or non-illuminated logo types that may or may not include secondary school name. Installed at the top floor of building exterior.

Select Your Sign

Use the table below to select the correct SKY10 Series Sign type for your needs. Refer to specific

SKY SERIES:				
BUILDING STORY	INTERNALLY ILLUMINATED SKYLINE	NON-ILLUMINATED SKYLINE	RUTGERS LOGOTYPE + SCHOOL NAME	NON-ILLUMINATED SCHOOL NAME ONLY
1-3	SKY13	SKY15	* NOTE 2	SKY17
4-8	SKY12/ SKY13	SKY15/ SKY14	* NOTE 2	SKY17/ SKY16
9-12	SKY12	SKY14	* NOTE 2	SKY16
13-16	SKY11/ SKY12	N/A	* NOTE 2	N/A
> 16	SKY11	N/A	* NOTE 2	N/A

Notes:

1. Heights shown in this document are suggested, but a full site survey and elevation study by Rutgers Design and Facilities Team is required prior to determining final size.

2. If Rutgers logotype and/or school name are desired, follow brand guidelines document made available by University Marketing and Communications.

Vehicular Directional - DR10 Series

DR10 Series

Function

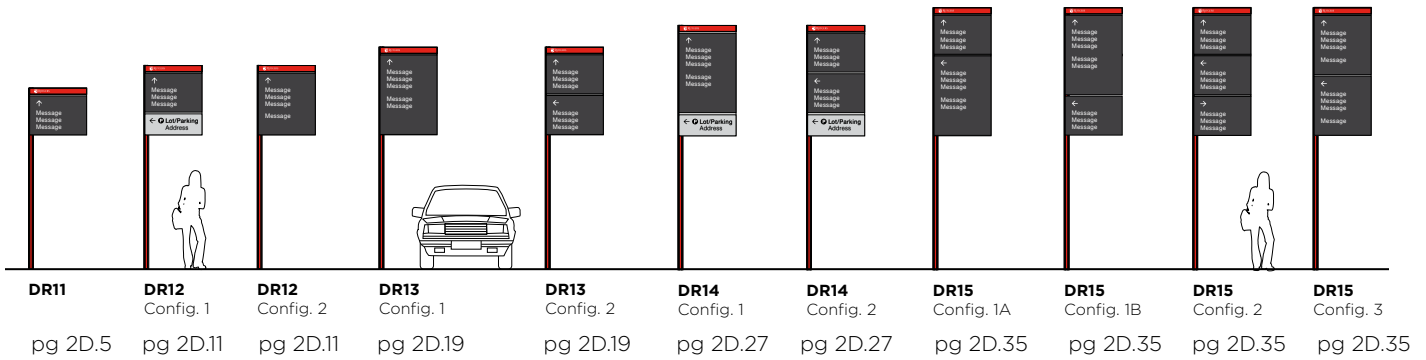

Provides vehicular directions to primary visitor destinations.

Application

Used in urban settings where there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct DR10 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR10 SERIES:							
	1 MSG	2 MSG	3 MSG	4 MSG	1 MSG + 1 PARK	2 MSG + 1 PARK	3 MSG + 1 PARK
1 ARROW	DR11 Config. 1	DR12 Config. 2	DR13 Config. 1	X	DR12 Config. 1	N/A	N/A
2 ARROW	N/A	DR13 Config. 2	DR15 Config. 1A/1B Config. 3	DR15 Config. 1A/1B Config. 3	DR12 Config. 1	DR14 Config. 1	DR14 Config. 1
3 ARROW	N/A	N/A	DR15 Config. 2	N/A	N/A	DR14 Config. 2	X

X = Configuration is not permissible in system due to legibility restraints.

Parking Directional - DR20 Series

DR20 Series

Function

Provides vehicular directions to parking lots and garages.

Application

Used to direct to parking lots and garages in urban settings.

Select Your Sign

Use the table below to select the correct DR20 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR20 SERIES:			
	1 PARK	2 PARK	3 PARK
1 ARROW	DR21	N/A	N/A
2 ARROW	N/A	DR22	N/A
3 ARROW	N/A	N/A	DR23

Vehicular Directional - DR30 Series

DR30 Series

Function

Provides vehicular directions to primary visitor destinations.

Application

Used in suburban and rural settings where there is visibility and enough space for the sign.

Select Your Sign

DR30 SERIES:							
	1 MSG	2 MSG	3 MSG	4 MSG	1 MSG + 1 PARK	2 MSG + 1 PARK	3 MSG + 1 PARK
1 ARROW	DR31 Config. 1	DR32 Config. 2	DR33 Config. 1	X	N/A	N/A	N/A
2 ARROW	N/A	DR33 Config. 2	DR35 Config. 1B Config. 3	DR35 Config. 1A/1B	DR32 Config. 1	DR34 Config. 1	DR34 Config. 1
3 ARROW	N/A	N/A	DR35 Config. 2	X	N/A	DR34 Config. 2	X

X = Configuration is not permissible in system due to legibility restraints.

Parking Directional - DR40 Series

DR40 Series

Function

Provides vehicular directions to primary visitor destinations.

Application

Used in suburban and rural settings where there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct DR40 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR40 SERIES:

	1 PARK	2 PARK	3 PARK
1 ARROW	DR41	N/A	N/A
2 ARROW	N/A	DR42	N/A
3 ARROW	N/A	N/A	DR43

Vehicular Directional - DR50 Series

DR50 Series

Function

Provides vehicular directions to primary visitor destinations.

Application

Used in suburban and rural settings where the messages do not fit on DR30 Series sign width and there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct DR50 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR50 SERIES:						
	1 MSG	2 MSG	3 MSG	1 MSG + 1 PARK	2 MSG + 1 PARK	3 MSG + 1 PARK
1 ARROW	DR51 Config. 2	DR51 Config. 2 DR52 Config. 1	DR52 Config. 1	N/A	N/A	N/A
2 ARROW	N/A	DR52 Config. 2	X	DR51 Config. 1	DR53 Config. 1	DR53 Config. 1
3 ARROW	N/A	N/A	X	N/A	DR53 Config. 2	X

X = Configuration is not permissible in system due to legibility restraints.

Parking Directional - DR60 Series

DR60 Series

Function

Provides vehicular directions to parking lots and garages.

Application

Used in suburban and rural settings where the messages do not fit on DR30 Series sign width and there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct DR60 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR60 SERIES:			
	1 PARK	2 PARK	3 PARK
1 ARROW	DR63	N/A	N/A
2 ARROW	N/A	DR62	N/A
3 ARROW	N/A	N/A	DR61

Parking Directional - DR70 Series

DR70 Series

Function

Provides vehicular trailblazers for urban conditions to parking lots and garages.

Application

Used in urban settings where there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct DR70 Series Sign type for your needs based on number of messages, arrows and installation condition. Refer to specific page for details and design intent drawings.

DR70 SERIES:	
NEW POLE	EXISTING POLE
DR71/ DR72	DR73/ DR74

Vehicular Trailblazer - DR80 Series

DR80 Series

Function

Provides vehicular directions to Rutgers campus and primary destinations frequently accessed by first time visitors while reinforcing the brand.

Application

Used on the entrances to campus to direct visitors to Rutgers and primary destinations.

Select Your Sign

Use the table below to select the correct DR80 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

DR80 SERIES:			
	0 MSG	1 MSG	2 MSG
1 ARROW	DR81	DR82	N/A
2 ARROW	N/A	N/A	DR83

Pedestrian Directional - PDR10 Series

PDR10 Series

Function

Connects destinations at main pedestrian intersections.

Application

Directional sign positioned at key moments on main pedestrian paths of travel.

Select Your Sign

Use the table below to select the correct DR30 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

PDR10 SERIES:											
	1 MSG	2 MSG	3 MSG	4 MSG	5 MSG	6 MSG	3 MSG + 1 PARK	3 MSG + 2 PARK	3 MSG + 3 PARK	4 MSG + 1 PARK	4 MSG + 2 PARK
1 ARROW	PDR11 Config. 2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
2 ARROW	N/A	PDR11 Config. 2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
3 ARROW	N/A	N/A	PDR11 Config. 2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Orientation Map - ORT10 Series

ORT10 Series

Function

Provides pedestrian campus map with main destinations.

Application

Used in key gathering spaces i.e. campus cores and transit stops.

Select Your Sign

Refer to specific page for details and design intent drawings.

ORT11

pg 2E.83

Building Identification - ID10 Series

ID10 Series

Function

Provides pedestrian-scale building identification.

Application

Located at or adjacent to building main entrance.

Select Your Sign

Use the table below to select the correct ID10 Series Sign type for your needs based on number of messages and arrows. Refer to specific page for details and design intent drawings.

ID10 SERIES:

Notes:

1. Site survey for sign location required prior to determining-KSK type

Transit Identification - TR10 Series

TR10 Series

Function

Provides identification for Rutgers transit stops throughout campus.

Application

Used adjacent to transit stops.

Select Your Sign

Use the table below to select the correct TR10 Series Sign type for your needs based on number routes needed to be identified on the stop identifier. Refer to specific page for details and design intent drawings.

Parking Regulatory - RG10 Series

RG10 Series

Function

Provides parking space identification and parking regulatory information.

Application

Used in suburban and rural settings where there is visibility and enough space for the sign.

Select Your Sign

Use the table below to select the correct RG10 Series Sign type for your needs based on number of messages. Refer to specific page for details and design intent drawings.

SECTION C:

ARRIVAL GATEWAY

AR10 ARRIVAL GATEWAY

BNR10 BANNERS

SKY10 SKYLINE IDENTIFICATION

Some arrival signs were implemented prior to the completion of this Universitywide Standard. These signs have been documented and are represented in this section. There are some arrival signs that are unique to the Health Science campus and can be found in **Section J** of this manual.

AR10 Series – Arrival Gateway

AR10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and/or Department of University Facilities and Capital Planning and Development.

Sign Selection Process*

Below are the following steps for selecting the correct arrival gateway for your needs:

A. Identify if the entrance is primary or secondary by referencing highway signage, analyzing circulation paths and programming documents.

B. Strategize sign type details by considering the following factors:
- Size and scale needed for location and creating optimal sight lines

- Existing ground conditions and space availability.

- Distinguish between daytime and night time viewing. Does this sign need to be illuminated?

C. Select from the typical module widths based on previous steps. See graphic layout pages for sample typographic layouts.

D. Review graphic don'ts to ensure proper selection.

E. Prepare a mock-up to review with fabricator on site to ensure proper selection.

**Arrival sign types, configurations and sizes are all site specific and need to be developed based upon each individual location.*

Guidelines

- Identify primary campus entrances and core area of the campus.
- Establish the brand equity in the built environment with Rutgers logo-type and University Shield.
- Use as a single-sided element only. Placement and location should allow for optimal sight lines from the entry point.
- Do not modify panel configuration, color or any other physical or graphic elements.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying arrival gateway signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

GRAPHIC LAYOUT

BNR10 Series - Banners

BNR10 Series Overview

Recommended graphics shown. Additional graphics must be approved by Rutgers University Environmental Graphics Coordinator and/or Department of University Facilities and Capital Planning and Development. Contact the Office of Strategic Communications for information regarding the banner program.

Guidelines

- Banners provide visibility of campus boundaries and main thoroughfares.
- The spirit R is only to be used to mark the perimeter or arrival to an athletic facility.
- Reference BNR10 Series chart for appropriate use.

BNR10 SERIES:					
BANNER TYPE	CAMPUS ARRIVAL	ATHLETIC FACILITIES/FIELDS	CAMPUS CORE	PEDESTRIAN PATHS	SURROUNDING CITY STREETS
BNR11	X	N/A	N/A	N/A	X
BNR12	X	N/A	N/A	N/A	X
BNR13	X	N/A	N/A	N/A	X
BNR14	X	N/A	N/A	N/A	X
BNR15	N/A	X	N/A	N/A	N/A
BNR16	N/A	N/A	X	X	N/A

Helpful Hints

- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

Questions? Please contact [xxxxx](#)

SKY10 Series – Skyline Identification

SKY10 Series Overview

Recommended sign type configurations shown. Additional configurations must be approved by Rutgers University Environmental Graphics Coordinator and/or Department of University Facilities and Capital Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct skyline sign for your needs.

A. Determine if logotype and/or building name lettering is needed. Refer to Rutgers brand guidelines to ensure proper selection.

B. Strategize location by considering the following factors:

- Optimal sight lines on surrounding roadways and highways
- Proximity and location of skyline in relationship to the campus

C. Distinguish between daytime and night time viewing. Does this sign need to be illuminated?

D. Select from the typical letter and logo sizes based on the approximate building heights.

E. Prepare a paper template mock-up to review with fabricator on site to ensure proper selection.

Note: Check if there is existing power in this location; all skylines should be illuminated

Guidelines

- Skyline Identification signs are used as markers to create campus visibility from neighboring highways and streets.
- Strategically locate skyline signs on buildings that give signs optimal sight lines for distance viewing.
- Skyline signs create a sense of place and help define a campus.
- Skyline signs are typically used on buildings over 13 floors if space allows.

SKY SERIES:				
BUILDING STORY	INTERNALLY ILLUMINATED SKYLINE	NON-ILLUMINATED SKYLINE	RUTGERS LOGOTYPE + SCHOOL NAME	NON-ILLUMINATED SCHOOL NAME ONLY
1-3	SKY13	SKY15	* NOTE 2	SKY17
4-8	SKY12/ SKY13	SKY15/ SKY14	* NOTE 2	SKY17/ SKY16
9-12	SKY12	SKY14	* NOTE 2	SKY16
13-16	SKY11/ SKY12	N/A	* NOTE 2	N/A
> 16	SKY11	N/A	* NOTE 2	N/A

Notes:

1. Heights shown in this document are suggested, but a full site survey and elevation study by Rutgers Design and Facilities Team is required prior to determining final size.

2. If Rutgers logotype and/or school name are desired, follow brand guidelines document made available by University Marketing and Communications.

Helpful Hints

- Keep in mind visibility and sightlines when locating and specifying skyline identification signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including zoning, Building codes, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

Paint Interior: **P4**.
Paint Exterior: **P6**.
- E LED Lighting**
Sloan red VL Plus LED light fixtures, mounted to interior side of letter face.
- F Electrical Component**
16 ga. GA Cable. All components to be as per the NEC and UL listed for the application.
- G Weep Hole**
As needed for moisture and ventilation control.
- H Spacer**
1/2" d. Painted aluminum spacer to allow for moisture drainage behind sign.
Paint: **P6**.
- I Jewelite Silver Trim-cap**
1" w.

SKY11-13

SKYLINE IDENTIFICATION

Specifications

J Letter Return

.063" thk. Aluminum return welded to Channel Back.
Paint Interior: **P4**.
Paint Exterior: **P6**.

K Fastener

3/8" dia. Non-corrosive fasteners mounted to wall surface.
Site conditions survey required, prior to fabrication, to determine best fastening method.

L Electrical Component

Standard flexible conduit.

M Electric Box

Galvanized transformer box w/ weather-proof cover.

N Electrical Component

Primary electrical wired to J-box by others. All components to be as per the NEC and UL listed for the application.

O Power Supply

20 Amp / 120 v. power supply mechanical fastened inside Electric Box.

P Electrical Component

Channel letter sign to include 120v. disconnect switch to be installed by fabricator and located at sign. Switch to be controlled by photocell, NIC, at remote location. Sign fabricator to coordinate requirements w/ general contractor.

Q Mount

Channel letter to electrical raceway with mechanical fasteners as required by engineering.

Note: All electrical components need to be UL listed appropriately for the environment to which they are being placed.

SKY11-13: Vertical Section

3" = 1'-0"

Use at all wall areas where fastening directly into wall surface is not feasible. Electrical components to be incorporated within sign raceway.

SKY11-13: Vertical Section

3" = 1'-0"

Use at all wall areas where fastening directly into wall surface is feasible. Remote electrical components required.

Attachment Note:
The attachment method shown may not be used for every wall condition. Site survey and engineering are to determine best methods for attaching sign to building facade.

SUB-SECTION

SECTION D:

DR10 SERIES

DR10 Series – Single Post Directional

DR10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

- A. Analyze location and space availability. DR10 series is used primarily in urban environments where space is limited.
- B. Determine the number of messages and parking messages you require.
- C. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?
- D. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.
- E. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single-sided sign only.
- Use where space availability is limited (urban environments).
- Do not use parking panels on this sign type.
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- One arrow to be used for multiple messages listed in the same direction.
- Arrow order should be as follows: Up (Straight), Left, Right.
- Destinations in the same direction (on the same panel) should be listed nearest to farthest.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SUB-SECTION

SECTION D:

DR20 SERIES

DR20 Series – Single Post: Parking Only

DR20 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

A. Analyze location and space availability. DR20 series is used primarily in urban environments where space is limited.

B. Determine the number of parking messages you require.

C. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

D. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.

E. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single-sided sign only.
- Use where space availability is limited (urban environments).
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- Arrow order should be as follows: Up (Straight), Left, Right.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION D:

DR30 SERIES

DR30 Series – Double Post Directional

DR30 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

A. Analyze location and space availability.

B. Determine the number of messages and parking messages you require.

C. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

D. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.

E. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single or double sided sign. Message standards apply to both sides.
- Do not use parking panels on this sign type.
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- One arrow to be used for multiple messages listed in the same direction.
- Arrow order should be as follows: Up (Straight), Left, Right.
- Destinations in the same direction (on the same panel) should be listed nearest to farthest.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

ELEVATION

Specifications

A RU_LogoType.eps

1 1/2" T-cap height.
Artwork provided by client.
Apply to front surface of panel.
Applied Vinyl: **V1**.

B Copy

3" X-cap Height.
Type: Helvetica Neue Regular.
Tracking: +50.
Apply to front surface of panel.
Applied Vinyl: **V1**.

C Arrow_Symbol.eps

4" Height.
Artwork provided by client.
Apply to front surface of panel.
Applied Vinyl: **V1**.
Rotate arrow around object center-point.

I Arrow_Symbol.eps

4" Height.
Artwork provided by client.
Apply to front surface of panel.
Applied Vinyl: **V3**.
Rotate arrow from object center-point.

J Copy

3" X-cap Height.
Type: Helvetica Neue Regular.
Tracking: +50.
Apply to front surface of panel.
Applied Vinyl: **V3**.

H Secondary Copy

2 1/2" X-cap Height.
Type: Helvetica Neue Light.
Tracking: +50.
Apply to front surface of panel.
Applied Vinyl: **V1**.

PNL.1
3/4" = 1'-0"

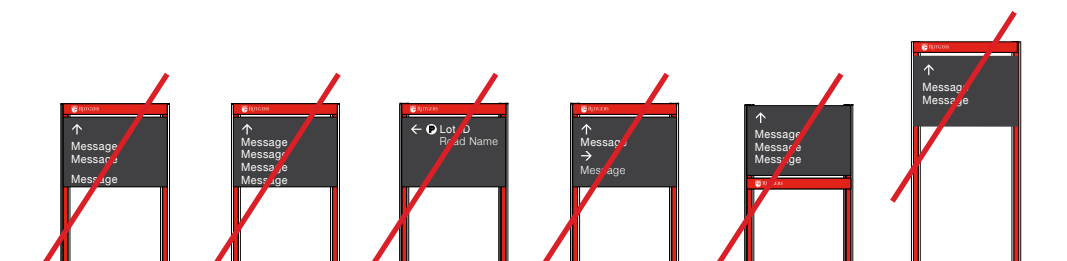

PNL.2 (max. message)
3/4" = 1'-0"

PNL.2- Variation
1/2" = 1'-0"
Use where Emergency or Ambulance destination is used.

PNL.2- Variation (max. message)
1/2" = 1'-0"

GRAPHIC LAYOUTS

No more than **ONE** message per sign.

No more than **THREE** lines per message.

Parking messages are **NOT** allowed on a dark grey background.

Only **ONE** arrow direction per panel.

Do **NOT** rearrange panel order.

Bottom of Panel **MUST** match 27" baseline.

SUB-SECTION

SECTION D:

DR40 SERIES

DR40 Series – Double Post: Parking Only

DR40 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

- Analyze location and space availability.
- Determine the number of parking messages you require.
- Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?
- Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.
- Review graphic don'ts to ensure proper selection.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single or double sided sign. Message standards apply to both sides.
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- Arrow order should be as follows: Up (Straight), Left, Right.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION D:

DR50 SERIES

DR50 Series – Double Post Wide

DR50 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

- A. Analyze location and space availability.
- B. Determine the number of messages and parking messages you require.
- C. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?
- D. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.
- E. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single or double sided sign. Message standards apply to both sides.
- Do not use parking panels on this sign type.
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- One arrow to be used for multiple messages listed in the same direction.
- Arrow order should be as follows: Up (Straight), Left, Right.
- Destinations in the same direction (on the same panel) should be listed nearest to farthest.

Helpful Hints

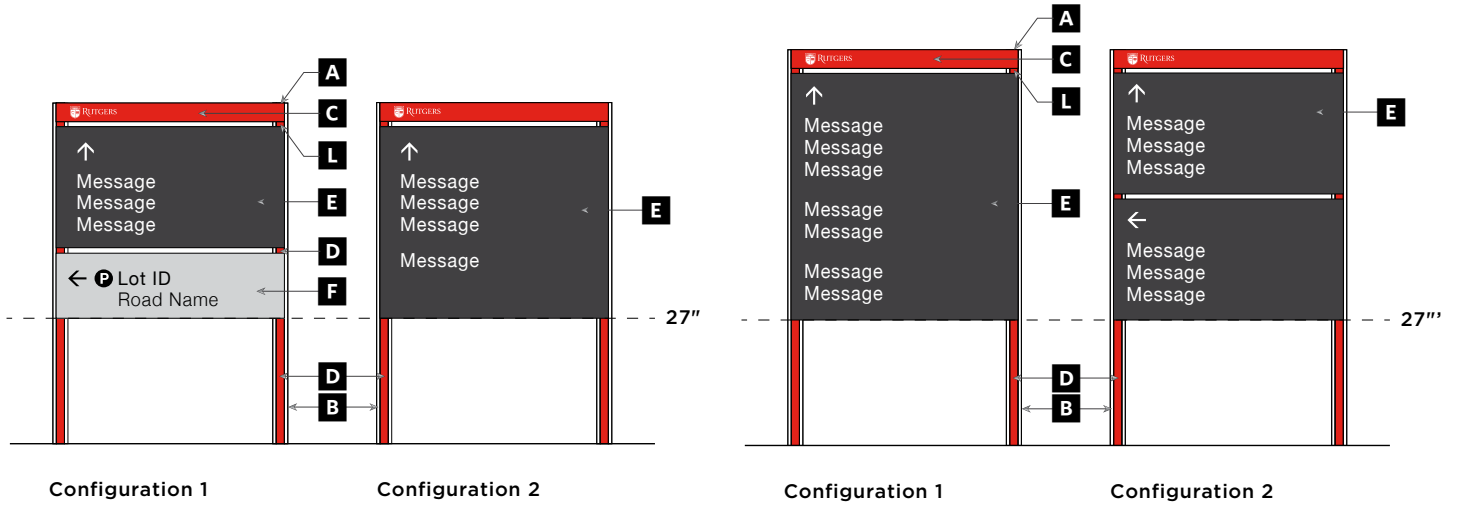

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION D:

DR60 SERIES

DR60 Series – Double Post Wide: Parking

DR60 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Guidelines

- Provide sequential vehicular guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single or double sided sign. Message standards apply to both sides.
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.
- Arrow order should be as follows: Up (Straight), Left, Right.

Helpful Hints

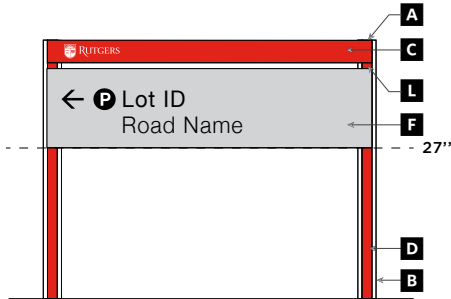

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION D:

DR70 SERIES

DR70 Series – Parking Trailblazer

DR70 Series Overview

Recommended sign type configurations shown. Additional layouts configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

A. Analyze location and space availability. DR70 series is used primarily in urban environments where space is limited.

B. Determine parking locations and arrow directions needed.

Guidelines

- In an urban environment where space is limited, trailblaze to campus parking if multiple lots are in the same direction.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single-sided sign only. Two single-sided signs may be mounted to either side of an existing pole or structure.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

DR80 SERIES

DR80 Series – Highway Trailblazer

DR80 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Guidelines

- Provide sequential vehicular guidance at the edges of campus or highway exits with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with accent color and Rutgers logo-type.
- Use as a single sign only.
- Only primary destinations accessed by first time visitors are to be included on this sign. (i.e visitors center, athletic center)
- Do not re-arrange panel order. Rutgers header is always at the top. See graphic layout page for graphic don'ts.
- One arrow direction per panel.

SUB-SECTION

SECTION E:

PDR10 SERIES

PDR10 Series – Pedestrian Directional

PDR10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development

Sign Selection Process

Below are the following steps for selecting the correct pedestrian directional for your needs.

A. Determine the number of messages and parking messages you require.

B. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

C. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.

D. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide pedestrians with sequential guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with brand color on the header.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign. It is acceptable to use a different configuration on each side.
- Locate signs at key decision points and at locations of optimal line of sight from public buildings and campus core.
- Arrow order should be as follows: Up (straight), Left, Right.
- Do not rearrange panel order.

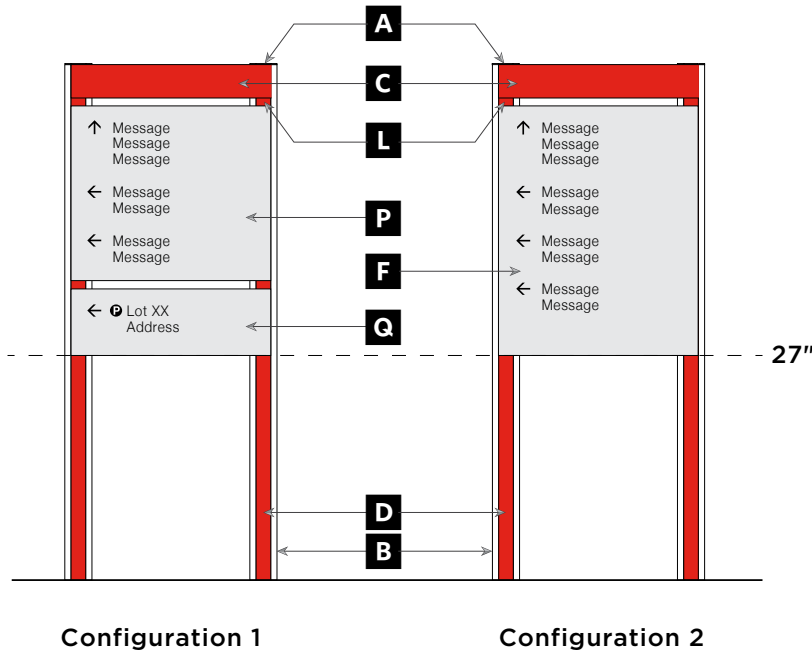

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION E:

PDR20 SERIES

PDR20 Series – Directional with Map

PDR20 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct pedestrian directional for your needs.

A. Determine the number of messages and parking messages you require. Verify “heads up” map orientation and artwork per sign placement.

B. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

C. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts and map artwork guidelines.

D. Review graphic don'ts to ensure proper selection.

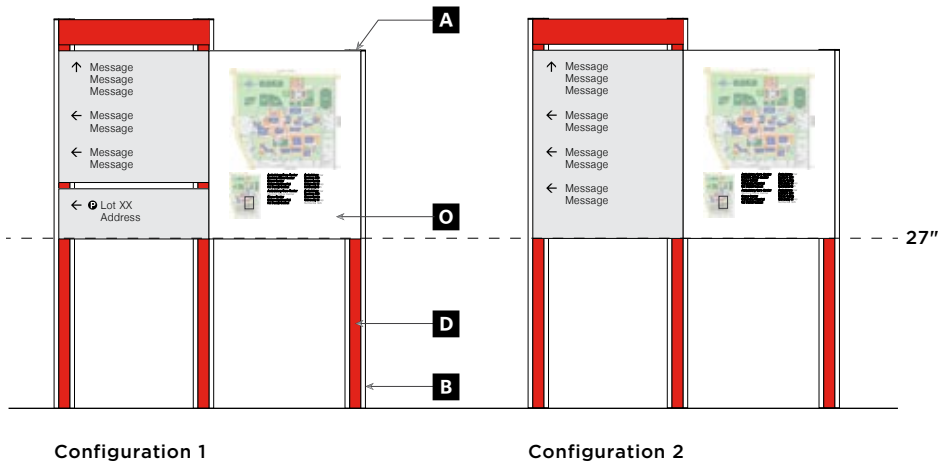

Guidelines

- Provide pedestrians with sequential guidance throughout the campus with strategic placement and programmed messaging.
- Reinforce the brand equity in the built environment with brand color on the header.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign. It is acceptable to use a different configuration on each side.
- Locate signs at key decision points and at locations of optimal line of sight from public buildings and campus core.
- Arrow order should be as follows: Up (straight), Left, Right.
- Do not rearrange panel order.
- Map orientation to match view of pedestrian when standing at the sign. What is shown ahead of you on the map should appear ahead of you.
- Contact Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development for correct map artwork.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings

ORT10 SERIES

ORT10 Series – Orientation Map

ORT10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

A. Verify “heads up” map orientation and artwork per sign placement.

Guidelines

- Provide pedestrians with a visual guide of the campus.
- Reinforce the brand equity in the built environment with brand color on the header.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign.
- Map “heads up” orientation to match view of pedestrian when standing at the sign. What is shown ahead of you on the map should appear ahead of you.
- Contact Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development for correct map artwork.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior directional signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION F:

ID10 SERIES

ID10 Series – Building Identification

ID10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct building identification for your needs.

A. Determine the building name to be identified on the sign.

B. Determine placement and visibility needs of the sign.

C. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

D. Select from the typical module heights based on previous steps. See graphic layout pages for sample typographic layouts.

E. Review graphic don'ts to ensure proper selection.

Guidelines

- Identify buildings at a pedestrian scale using the full name and address. One building is to be identified per sign. The exception would be existing buildings that are connected and share a common entrance.
- Reinforce the brand equity in the built environment with accent color and Rutgers seal.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign.
- Signs should be located in close proximity to primary building entrance or pedestrian path.
- No abbreviations are to be used for building names.
- Do not rearrange panel order.

Helpful Hints

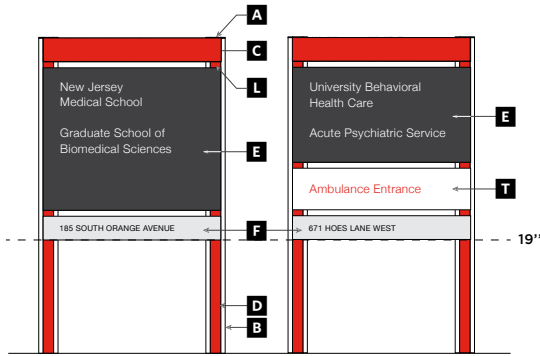

- Keep in mind the transportation path of the user when locating and specifying exterior identification signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

ID30 SERIES

ID30 Series – Building Identification

ID30 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct building identification plaque for your needs.

- Analyze location and determine if the building lies within Rutgers University property.
- Determine placement and visibility needs based on location of ID10/20 Series, existing condition and primary and secondary entrances.
- Determine messaging lengths.
- Select from typical module.
- Review graphic don'ts to ensure proper selection.

Guidelines

- To identify a building's primary and secondary entrances with its full name and address.
- Signs should identify buildings by name and include the Rutgers University building number.
- Reinforce the brand equity in the built environment with the red accent color.
- No abbreviations are to be used for building names.
- Do not rearrange panel order.

Helpful Hints

- Keep in mind the transportation path of the user when locating and specifying exterior identification signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

ID40 SERIES

ID40 Series – Building Identification

Room ID Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct building identification for your needs.

- A. Determine the building name to be identified.
- B. Determine the placement and visibility needs of sign.
- C. Determine messaging lengths and character (letter) counts for each message.
- D. Determine appropriate letter size based on building height chart.
- E. Test estimated letter size using a paper template to ensure proper selection.
- F. Review graphic don'ts to ensure proper selection.

Guidelines

- Identification signs are used to create building visibility.
- Strategically locate identification sign on building to give optimal sightline for distance viewing.
- Typically used on buildings with one to six floors.

Helpful Hints

- Keep in mind the transportation path of the user when locating and specifying exterior identification signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

ID50 SERIES

ID50 Series – Building Identification

ID50 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct vehicular directional for your needs.

A. Determine the number of messages you require.

B. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?

C. Select from the typical module heights based on previous steps. See graphic layout pages for Sample Typographic Layouts.

Guidelines

- To identify buildings at building entrances with the full name, address and building number.
- Brand: Reinforce the brand equity in the built environment with the Rutgers logotype.
- Any combination of these elements can be used as necessary for each individual location. Refer to Rutgers Visual Identity Manual for usage.
- No abbreviations are to be used on building identification signage.

Helpful Hints

- Keep in mind the transportation path of the user when locating and specifying exterior identification signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

ID60 SERIES

ID60 Series – Building Identification

ID60 Series Overview

Typical existing canopy conditions shown. Additional conditions must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct canopy identification for your needs.

- A. Determine the shape, area and square footage of canopy and space availability for messaging. Determine application of message.
- B. Determine message lengths and character (letter) counts for each message. Are your messages 1, 2 or 3 lines long?
- C. Determine space availability for your message based on desired letter height and canopy size, area of availability.
- D. Select from the typical examples shown based on the previous steps. If your canopy does not fit in these conditions, please contact Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development. See graphic layout pages for Sample Typographic Layouts.
- E. Consult with the Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development and fabricator to ensure proper fabrication and installation.

Guidelines

- To identify buildings at building entrances with the full name, address and building number.
- Brand: Reinforce the brand equity in the built environment with the Rutgers logotype.
- Any combination of these elements can be used as necessary for each individual location. Refer to Rutgers Visual Identity Manual for usage.
- No abbreviations are to be used on building identification signage.

Helpful Hints

SECTION G:

PRK10 SERIES

PRK10 Series – Parking Identification

PRK10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct parking identification for your needs.

A. Verify the parking area/lot name, street associated with the lot and regulatory information.

B. Analyze the location, mounting detail and space availability.

C. Determine message lengths and character (letter) counts for each message.

D. Select from the typical module widths based on previous steps. See graphic layout pages for sample typographic layouts.

E. Review graphic don'ts to ensure proper selection.

Guidelines

- To identify parking areas using the lot name and street associated with the lot.
- Reinforce the brand equity in the built environment with accent color & Rutgers logo-type header.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign.
- Locate freestanding parking identification signs at parking lot/area entrances or driveways. Only one lot should be identified per sign.
- Do not rearrange panel order.
- The bottom panel is designated for parking information only (i.e. A parking pass is needed from 8am-5pm)
- Non-motorized parking areas may be identified. See graphic layouts for correct usage.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior parking identification signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

PRK10 SERIES:

LOT ID: Up to 7 characters

GRAPHIC DON'TS

SUB-SECTION

SECTION G:
PRK20

PRK20 Series – Parking Identification: W10E

PRK20 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct parking identification for your needs.

A. Verify the parking area/lot name, street associated with the lot and regulatory information.

B. Analyze the location, mounting detail and space availability.

C. Determine message lengths and character (letter) counts for each message.

D. Select from the typical module widths based on previous steps. See graphic layout pages for sample typographic layouts.

E. Review graphic don'ts to ensure proper selection.

Guidelines

- To identify parking areas using the lot name and street associated with the lot.
- Reinforce the brand equity in the built environment with accent color & Rutgers logo-type header.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign.
- Locate freestanding parking identification signs at parking lot/area entrances or driveways. Only one lot should be identified per sign.
- Do not rearrange panel order.
- The bottom panel is designated for parking information only. (i.e. A parking pass is needed from 8am-5pm)
- Non-motorized parking areas may be identified. See graphic layouts for correct usage.

Helpful Hints

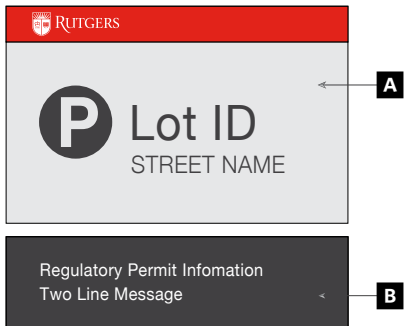

- Keep in mind the intuitive path of the user when locating and specifying exterior parking identification signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION G:

KSK10 SERIES

KSK10 Series – Kiosk Information

KSK10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct parking kiosk for your needs.

A. Verify the parking area/lot name, street address and regulatory information.

B. Analyze the location, mounting detail and space availability.

Guidelines

- Give parking instructions from a pedestrian viewpoint only.
- Reinforce the brand equity in the built environment with accent color pole.
- Locate signs throughout parking area to allow for a sight line from all parking spaces.
- Use as a single-sided or double-sided sign. Message standards apply to both sides of sign.
- QR code needs to be accessible by a standing or seated individual.
- Modifying graphic language on instruction panel will require approval by Rutgers Parking Authority and Rutgers University Environmental Graphics Coordinator & Department of Facilities, Planning and Development.

Helpful Hints

- Keep in mind the visibility and sight lines when locating and specifying exterior kiosk information signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

GRAPHIC DON'TS

SECTION H: TRANSIT

TR10 SERIES TRANSIT IDENTIFICATION

Some transit signs were implemented prior to the completion of this Universitywide Standard. These signs have been documented and are represented in this section. There are some transit signs that are unique to the Health Science campus and can be found in **Section J** of this manual.

TR10 Series – Transit Identification

AR10 Series Overview

Recommended sign type configurations shown. Additional module configurations must be approved by Rutgers University Environmental Graphics Coordinator & or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct transit identification for your needs:

A. Determine if the transit stop is new or existing. Determine number of routes that need to be identified on the transit identification sign.

B. Determine quantity needed for creating optimal sight lines based on bus stop length

C. Analyze existing ground conditions and space availability.

D. Review graphic don't's to ensure proper selection.

E. Prepare a mock-up to review with fabricator on site to ensure proper selection.

Guidelines

- Identify Rutgers transit stops.
- Maintain the brand equity in the built environment with Rutgers brand color.
- Use as a double-sided element. Placement and location should allow for optimal sight lines from the entry point.
- Do not modify panel configuration, color or any other physical or graphic elements.

Helpful Hints

- Keep in mind the transportation path of the user when locating and specifying transit signs.
- Refer to all appropriate state and local codes, as needed, for sign compliance including, but not limited to zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SECTION I:

RG10 SERIES

RG10 Series – Regulatory Information

RG10 Series Overview

Recommended sign type configurations shown. Additional layouts and configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct regulatory sign for your needs.

A. Determine the message that you require.

B. Review current campus signage in order to maintain message consistency.

C. Review graphic don'ts to ensure proper selection.

Guidelines

- Provide regulatory messaging or restrictive information at a variety of different locations.
- Brand reinforcement may be needed where it is necessary to indicate that Rutgers University is the enforcing entity. Or if it is unclear if you are on Rutgers University property.
- Use as a single-sided sign only. Two single-sided signs may be mounted to either side of an existing pole or structure.

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior regulatory signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

SUB-SECTION

SECTION I:

RG20 SERIES

RG20 Series – Regulatory Information

RG20 Series Overview

Recommended sign type configurations shown. Additional layouts and configurations must be approved by Rutgers University Environmental Graphics Coordinator and or Department of Facilities, Planning and Development.

Sign Selection Process

Below are the following steps for selecting the correct regulatory sign for your needs.

A. Determine the message that you require.

B. Review current campus signage in order to maintain message consistency.

Specifications

A Copy

1" X-cap Height.
Type: Helvetica Neue Regular
Tracking: +25.
Apply second-surface of glass.
Applied Vinyl: **V7**.

Guidelines

- Provide regulatory, informational or restrictive information at building entrances.
- Brand reinforcement may or may not be needed depending on building type.
- Use as a single-sided sign only.
- An arrow may be used for clarity.

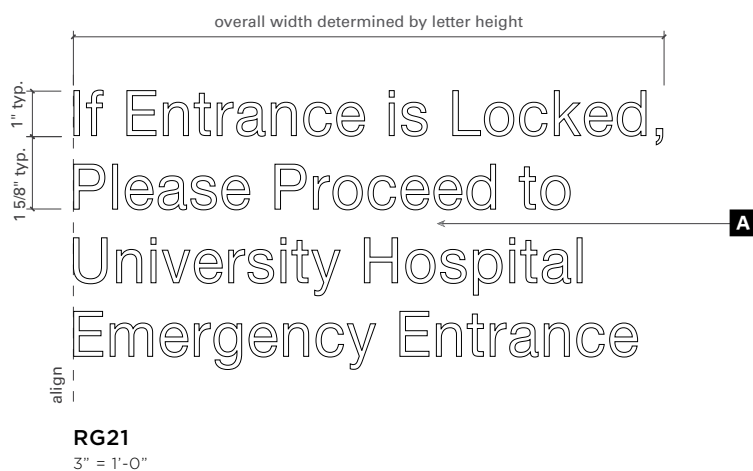

Helpful Hints

- Keep in mind the intuitive path of the user when locating and specifying exterior regulatory signs.
- Use only standard and approved nomenclature and abbreviations.
- Refer to all appropriate state and local codes, as needed, for sign compliance, including, but not limited to Zoning, ADAAG, MUTCD, etc.
- Sign fabricator to provide all relevant engineering calculations and provide all methods and materials of construction in shop drawings.

Specifications

A Copy

- 1" X-cap Height.
- Type: Helvetica Neue Regular
- Tracking: +25.
- Apply second-surface of glass.
- Applied Vinyl: **V7**.

ELEVATION

RG21: Install Elevation

3/16" = 1'-0"

Use when sign is used alone

RG21: Install Elevation

3/16" = 1'-0"

Use when sign is used w/ an ID50 series sign

For typography, finish/material and symbol specifications refer to **Manual Part 2, Section A: Graphic Standards**.

INSTALLATION

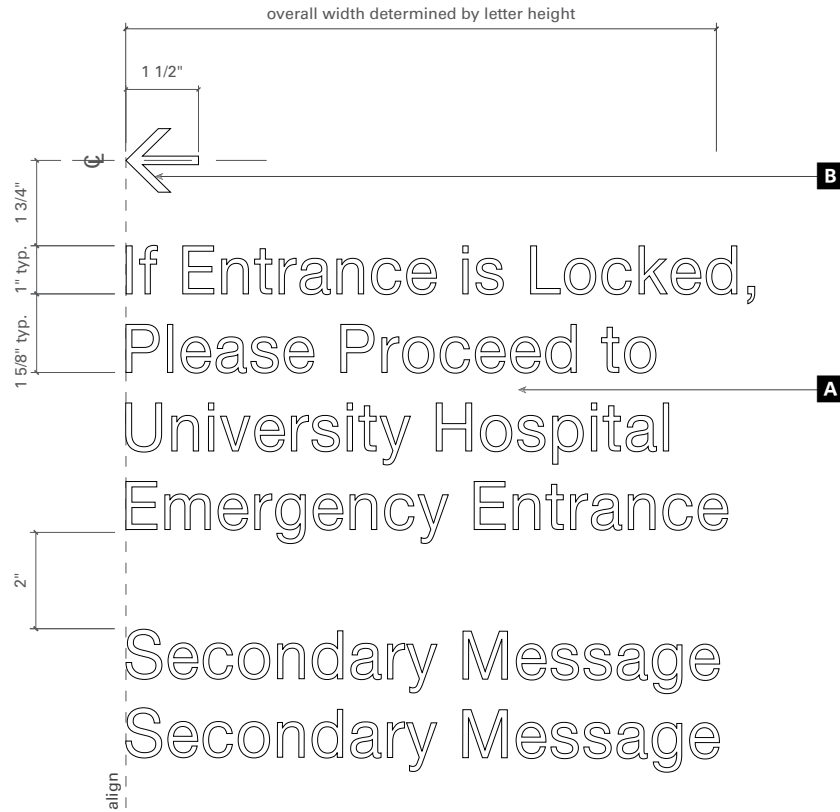

Specifications

A Copy

1" X-cap Height.
 Type: Helvetica Neue Regular.
 Tracking: +25.
 Apply second-surface
 of panel.
 Applied Vinyl: **V7**.

B Arrow_Symbol.eps

4" Height.
 Artwork provided by client. Apply
 to second surface
 of panel.
 Applied Vinyl: **V1**.
 Rotate arrow around object cen-
 ter-point.

RG22: Graphic Layout
 3" = 1'-0"

ELEVATION

RG21: Install Elevation
 3/16" = 1'-0"
 Use when sign is used alone

RG21: Install Elevation
 3/16" = 1'-0"
 Use when sign is used
 w/ an ID50 series sign

For typography, finish/material and symbol specifications refer to **Manual Part 2, Section A: Graphic Standards**.

INSTALLATION

SECTION J:

HEALTH
SCIENCES

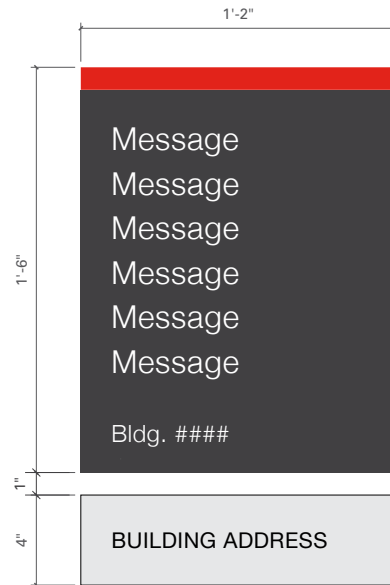

General Notes

The signs shown on this page were fabricated and installed for Rutgers Health Sciences and are unique to that campus only.

These sign specifications do not follow the standards set in section F, building identification, series ID30.

A thorough site survey of the existing sign and attachment method is required prior to fabricating new signs or new sign components.

Sign Shop drawings can be acquired through Rutgers facilities at [xxx.xxx.xxxx](#)

A thorough site survey of the existing sign and attachment method is required prior to fabricating new signs or new sign components.

Sign Shop drawings can be acquired through Rutgers facilities at xxx.xxx.xxxx

General Notes:

1. Matte, clear-coat all sign components for protection against natural elements and sun exposure.
2. All footer conditions to be verified in field and
 - a. reuse footer/foundation if viable;
 - b. engineer new footer/foundation per information collected in field survey.
3. Remove existing sign where required.
4. Provide weather-proofing, weep-holes, tight-seal gasketing, etc., as required.

For typography, finish/material and symbol specifications refer to **Manual Part 2, Section A: Graphic Standards**.

EXTERIOR
DETAIL &
SPECIFICATIONS

EXTERIOR POST

Specifications

A Post Cap

1/8" thk. Pre-punched and painted aluminum post cap, mechanically fastened w/ tamper-resistant, spanner-head screws. Paint all sides: **P4**.

B Sign Post

Extruded sign post w/inset grooves for ease of panel install and removal. Paint all sides: **P4**. All drilled holes to be weather-proofed for water and environmental considerations. *See post extrusion spec. information on Parts sheet.

C PNL

Painted aluminum panel w/ applied vinyl graphics. Custom extruded panel attachment to be mounted to back of panel w/ hi-bond adhesive.

D FP_1

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

J FP_2

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

K Structural Angle

1/4" thk. Painted aluminum L-angle, attached to back of sign panel, w/ hi-bond adhesive, and mechanically fastened to sign post. Paint all sides: **P4**. Paint fasteners heads to match: **P4**.

G FP_S

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

Component Parts / Assembly

For typography, finish/material and symbol specifications refer to **Manual Part 2, Section A: Graphic Standards**.

EXTERIOR POST

Specifications

- H Concrete Footer / Pad**
Minimum 3'-0" d. concrete footer. Each footer to conform to engineering requirements and appropriate wind-loads for individual structure.
- I Concrete Sidewalk**
If sign is located at sidewalk, remove sidewalk square, expansion joint to expansion joint, pour footer below sidewalk and re-pour sidewalk square.
- U Expansion Joint**
To accommodate concrete expansion and contraction.
- V Sand**
Compacted sand for condensation drainage per engineering requirements.
- W Attachment Bracket**
Rutgers owned custom extruded bracket cut to match height of aluminum plate (PNL). Permanently mount to back of plate (PNL).
***See post extrusion spec. information on Parts sheet.**
- N Sign Post**
Aluminum bar stock and tubing welded to create extrusion with appropriate groove for signage. Powder coated Rutgers Red.

The custom sign post must be used. For small projects a fabricated post detail is provided, for large projects (minimum of 2000 lbs./1300 linear feet) the Rutgers owned custom extrusion must be used. No substitutions allowed. For specification and ordering purposes, contact EMS Delaware;

EXISTING POST MOUNT

Specifications

A Sign Panel

1/8" thk. Painted aluminum w/ surface printed copy. Provide matte clear-coat, all surfaces.

B Existing Fence Picket

Size and shape to be verified through field conditions survey.

C L-angle Attachment

Custom size L-angle cut 3/4" short, t. and b., of sign panel; mechanically fasten to fence picket.

D Fastener

Tamper-resistant, spanner head fastener. Sign fabricator to review conditions and is responsible for engineering and number of fasteners req'd.

E Nut and Bolt Attachment

Threaded rod welded to back side of sign panel and bolted through backer plate on opposite side of fence.

Specifications

- F Existing U-channel Post**
- G Pin-mount Attachment**
Threaded rod drilled and tapped into back of cut-out form. Drill hole in wall surface and secure w/ hi-bond adhesive.
- H Spacer**
1/2" dia. x 1/4" d. Aluminum spacer w/ sandblasted edge returns. Provide matte clear-coat, all surfaces.
- I Porous Wall Surface**
- J VHB Foam Tape Attachment**
1/16" thk. Exterior grade VHB foam tape.
- K Non-Porous Wall Surface**
- L Existing Light Pole**
- M Strap-mount Attachment**
Bandit, or equal, stainless steel sign mounting attachment bracket, as required by sign engineering.
- N Strap-mount Attachment**
Bandit, or equal, stainless steel sign mounting straps, as required by sign engineering.
- ★ Install Mounting**
Surface mount to building facade, fence or existing pole; determine best mounting method via site conditions survey. Height of sign varies based on field survey conditions. 5'-0" above grade is optimal.

EXTERIOR SPECIFICATIONS

Specifications

A Post Cap

1/8" thk. Pre-punched and painted aluminum post cap, mechanically fastened w/ tamper-resistant, spanner-head screws. Paint all sides: **P4**.

B Sign Post

Extruded sign post w/inset grooves for ease of panel install and removal. Paint all sides: **P4**. All drilled holes to be weather-proofed for water and environmental considerations. ***See post extrusion spec. information on Parts sheet.**

C PNL.1 (Red Panel)

Painted aluminum panel w/ applied vinyl graphics. Custom extruded panel attachment to be mounted to back of panel w/ hi-bond adhesive. Paint all sides: **P2**.

D FP_1

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

E PNL.2 (Black Panel)

Painted aluminum panel w/ applied vinyl graphics. Custom extruded panel attachment to be mounted to back of panel w/ hi-bond adhesive. Paint all sides: **P2**. ***Use one panel only for single sided sign.**

F PNL.3 (Gray Panel)

Painted aluminum panel w/ applied vinyl graphics. Custom extruded panel attachment to be mounted to back of panel w/ hi-bond adhesive. Paint all sides: **P3**. ***Use one panel only for single sided sign.**

G FP_S

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

H Concrete Footer / Pad

Minimum 3'-0"d. concrete footer. Each footer to conform to engineering requirements and appropriate wind-loads for individual structure.

I Concrete Sidewalk

If sign is located at sidewalk, remove sidewalk square, expansion joint to expansion joint, pour footer below sidewalk and re-pour sidewalk square.

J FP_2

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**. ***Use only for single sided signs.**

K Structural Angle

1/4" thk. Painted aluminum L-angle, attached to back of sign panel, w/ hi-bond adhesive, and mechanically fastened to sign post. Paint all sides: **P4**. Paint fasteners heads to match: **P4**.

L FP_3

1/8" thk. Painted aluminum filler panel. Paint all sides: **P1**.

M Sign Panel Plate

1/8" Thk. aluminum plate cut to dimensions shown in elevations.

N Sign Post

Aluminum bar stock and tubing welded to create extrusion with appropriate groove for signage. Powder coated Rutgers Red.

O PNL.Map

Painted aluminum panel w/ applied vinyl graphics. Custom extruded panel attachment to be mounted to back of panel w/ hi-bond adhesive. Paint all sides: **P2**. ***Use one panel only for single sided sign.**
